Re.: Project Proposal (SNAG)

Classroom Noise Assessment @
St. Thomas Aquinas High School, (S.T.A.)
541 West Keith Road
North Vancouver, BC V7M 1M5
(604) 987-4431

Hi Murray!

I spoke with Mr. Dan Moric,
Principal at St. Thomas Aquinas last week
about having some noise measurements,
particularly in the West Wing @ Rm. 204 etc
when your student time permits. We recently cut
and fit tennis ball cushions for the rooms.
However, the ceilings are wood. Perhaps
acoustic tiles would help reduce noise. I'd
leave the project up to you and Dan Moric
(2006-2007) year, or Mr. Frank Dragojevic, new
Principal (2007-2008).

cc Sally Gill, SAC @ STA (April 10, 2007) Tom
Thanks Murray!

Triunovits' Conference 2007

Dear Pam,

Please find enclosed copies of current correspondence and articles supporting acoustics into legislation for the B.C. School Building Code. Please feel free to make copies for our Itinerant Workshop in Victoria. I hope our Hard of Hearing Teachers of the Deaf and Hearing support this project. The more mail our government reps receive, the more they are open to taking action. and acoustics in old and new schools is not going to get better without our help. Please ask each Teacher to write a letter and ask their students to write letters too. Their help will make a difference. Good luck at the Conference. Thank you, Tom
